

ELECTRICAL ENGINEERING STUDENT

JOSEPH HAZARD

CONTACT

- +33 7 81 83 26 78
- johazard@proton.me
- Bordeaux, France
- josephhazard.com
- www.linkedin.com/in/joseph-hazard

LANGUES

- French: Native**
- German: Native (11 years of residence)**
- English: Full professional proficiency (IELTS academic planned in December)**

COMPÉTENCES

Digital Design:

VHDL, Vivado, Design Vision, ModelSim

Simulation & Modeling:

MATLAB/Simulink, Scilab/Xcos

Electronics & SPICE Simulation

Cadence, Proteus, TINA-TI, LTspice, MPLAB (Microchip), PSIM

Programming

Python, C, C#, Arduino

Hands-on Experience

Model Rocketry, PC Assembly

Automation / Control Systems

Grafcet, Automgen, Labview

INTERESTS

- Playing the violin
- Sailing (Participated in regattas)
- Cooking
- Local cat fostering association
- Esports / Chess

EDUCATION

Master's Degree in Electronics (expected 2028)

2025 - 2028

Bordeaux INP - ENSEIRB-MATMECA Graduate School of Engineering, Bordeaux, France

- Working towards a master's degree in electronics
- Design of a PCB-based audio amplifier
- Embedded Electronics / Microprocessors / VHDL

Active member of the school's aerospace and space club (EirSpace):

- Participation in the design and preparation of a launch vehicle for the C'Space competition in Tarbes

Preparatory Classes for Engineering Schools

2023 - 2025

Lycée Saint-Louis, Paris, France

- Completed a 2-year intensive Maths and Physics program preparing for the selective entrance examination to French engineering schools
- Played in the school orchestra as a violinist
- Designed and built a DC motor prototype

High School

2016 - 2023

Lycée Jules Verne, Nantes, France

- Obtained the Baccalauréat with highest distinctions (equivalent to A levels)
- Participated in a virtual Mandarin exchange with Taiwanese students

WORK EXPERIENCE

Industrial internship - EREMS

July - August 2026

Toulouse, France

- Supported logistics operations and process improvement for Moisture Sensitive Devices (MSDs).
- Helped analyze and reorganize the handling and flow of MSDs.
- Worked alongside operational teams in an aerospace electronics environment.

Member, International Aerospace Community

2020 - Present

Online communities

Analysis and modeling of aerospace systems

- Visual and functional analysis of components observed on prototypes or development structures
- Developed 3D models of launch vehicle structures and components using Blender
- Provided technical contributions within an international aerospace community

Sailing Instructor

2023 - Present

Les Glénans Sailing School, Glénans Archipelago, France

Barbâtre Sailing School, Noirmoutier Island, Vendée, France

- Teach dinghy sailing to children and young adults in groups of 5-10, emphasizing safety and skill development
- Promote teamwork, shared responsibility and respect for the marine environment
- Encourage self-confidence, self-discipline and pushing personal limits
